Work Experience

Inovalon August 2022 – Present
Healthcare technology *Remote*

Senior Software Engineer *March 2025 – Present*

- Led development of the company-wide **application launcher**, the entry point every customer uses to reach Inovalon's products.
- Upgraded **Angular** applications from v14 to v21 across three major upgrades (14 → 16 → 19 → 21).
- Standardized shared Angular patterns and components across the company's product portals.

Software Engineer *March 2023 – March 2025*

- Turned **Cypress** test patterns into metadata-driven **Angular schematics**, cutting test creation time by 40%.
- Led the migration from Okta to **Azure AD B2C** to reduce costs, including custom extensions to the authentication library.
- Built multi-stage CI/CD pipelines in **Azure DevOps** for build, test, and deployment.
- Mentored and onboarded new engineers on the team.

Associate Software Engineer *August 2022 – March 2023*

- Built a metadata-driven pattern in **Angular** and **TypeScript** that generates CRUD screens from configuration.
- Co-built a shared component library from **Figma** designs, used in several product portals.

Computer Enterprises, Inc. (CEI) January 2021 – August 2022
Software Developer *Pittsburgh, PA*

- Built a SKU data ingestion pipeline in **TypeScript** and **Node.js** that processed files from several sources into **PostgreSQL**, feeding another team's UI that workers used each morning.
- Ran the services as **Docker** microservices on **AWS**, processing over 600,000 records daily.
- Wrote automated database tests in **Java** (MyBatis, HSQLDB) for healthcare data.

Projects

switch-microcontroller | *Python, C, Arduino*

- Extended an Arduino-based Nintendo Switch controller with **Python** scripts that shiny-hunt in Pokémon Brilliant Diamond / Shining Pearl unattended and send an email alert when one appears.

Education

Allegheny College May 2020
Bachelor of Science in Computer Science *Meadville, PA*

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML, CSS
Frameworks & Libraries: Angular, Node.js, Express, PrimeNG
Cloud & Identity: AWS (Lambda, DynamoDB), Azure AD B2C, Docker
Testing & Tooling: Cypress, Angular schematics, Azure DevOps CI/CD, Postman, Git, Figma
